

Gautam: Today, a lot of AI tutoring tools turn learning into a shortcut. You ask a question, copy the answer, and move on without building real understanding.

Sarvesh: BrainBook is built to help students think better. It is an adaptive AI textbook that gives small hints and follow-up questions so that students construct the explanation themselves. That means stronger reasoning, deeper understanding, and a more active learning process.

Gautam: BrainBook is the textbook that finally challenges you: a stimulating, personalized guide for the modern age!
